App Riciclaro

DEAR CITIZENS OF REZZATO,

The beginning of a new year is inevitably a time to take stock and make resolutions for the future.

2025 has brought with it important innovations, representing the beginning of a path to improve the efficiency of the waste management system, reduce environmental impact and create widespread sensitivity towards more sustainable practices.

The year that is ending has also confirmed that the Rezzato community is attentive and committed: we close 2025 with a percentage of separate waste collection of about 78%, a value higher than both the national average (67%) and the average

of northern Italy (73%). In the face of these numbers, I can only congratulate all of you citizens, with the hope of continuing on this path and improving further.

To help the whole community achieve this ambitious goal, in 2026 we are introducing improvements: a dedicated delivery service for animal bedding, the continuation of the free distribution of paper containers, the implementation of a collection dedicated to textiles at the Collection Center and the rethinking of the reuse island.

The Ecocalendar will then be available in several languages to include, raise awareness and empower those who

who struggle with the Italian language.

The commitment of the Administration is aimed at having an increasingly broad service that is attentive to the needs of individuals and to ensure widespread control activities on the territory to intercept abandonment phenomena, with the ultimate goal of improving the cleanliness and decorum of our territory by reducing the production of non-recyclable waste.

Every citizen, therefore, can make a difference: the sum of small gestures can generate a great impact on the community and contribute to the goal of continuous improvement.

I invite you to carefully consult the 2026 calendar where you can find, in addition to the days of the individual collections, all the news for the coming year and the environmental-themed events that we have designed to involve all citizens. The Riciclario app is also always available to remind you, through a special notification, which waste to dispose, with the possibility of making reports and receiving updates on the collection service.

Once again thank you and a warm greeting to all of you.

Mattia Musletti

Assessore all'ecologia - Comune di Rezzato

Bags for door-to-door collection

For all collections, only use the distributed bags.

Bags for separate waste collection can be collected independently from distributors in the municipal area using the national service card.

All adult members of the family unit can access with their card.

Businesses and companies can collect the bags with the special card provided.

Domestic utilities:

by going to the Tari counter on the opening day (see opening days and hours on page 11) annual supplies can be withdrawn.

Non-domestic users:

can agree on the collection of the annual supply by calling the Tari Desk (see page 11).

Organic:

Domestic users can use bioplastic bags by collecting them from vending machines, use bioplastic bags on the free market, or recycle fruit/vegetable bags or supermarket bags.

Plastics and diapers:

No variations.

Roadside collection clothing and shoes

Starting from January 2026, the yellow containers for the collection of clothing present in the area will be removed

As stated in the D.lgs.

116/2020, special **containers for clothing** will be located at the collection center. At the collection center it will be possible to deliver everything that is **not clothing**: blankets, sheets, rags etc (textiles) that cannot and must not be mixed with clothing.

Litter collection at the collection center.

Do you have a cat? Or an animal that produces litter?

Contact the Ecology office at no. 030249744/46 and ask for information about it. If the cat is already registered in ATS (microchip), you can collect special bags for delivery at the collection center. Only redundancies exceeding the quantity guaranteed in the tariff will be counted and paid.

If you do not have a registered cat and want to join the service, contact the ecology office. You will be provided with information for free chipping at an affiliated association.

Door-to-door collection of green waste

• Who can activate it:

The service is available to all users and requires activation (030/249732)

• How the collection is carried out.

Display by means of a 120 lt or 240 lt wheeled container to be collected at the Tari office (see timetable on the next page).

The collection of the vegetable takes place on Monday morning and the user must display the waste only placed inside the container. No branches or bundles placed outside it will be collected.

Home composting

For those who own a garden, home composting is a simple practice that allows you to naturally transform the waste from kitchens, vegetable gardens and gardens. The degradation of bacteria, in the presence of oxygen, transforms vegetable and kitchen waste into fertile humus, rich in nutrients.

Why compost?

• **For the environment.** Kitchen waste makes up about a third of the waste produced by each citizen. With the practice of home composting such waste

becomes a resource, ensuring more hygiene to the bins at home

• **For the fare.** Call 800816884 for further informations
